

Why Choose Enviro-Solutions Certified Green?

Because Enviro-Solutions is:

PROVEN...

- ... Solutions
- ... Safer for People
- ... More Environmentally Sound
- ... Competitive in Performance & Price
- ... Not Just Another Green Products Line

ENVIRO-SOLUTIONS FOR RESPONSIBLE ALTERNATIVES

Enviro-Solutions, an ISO-9001 Certified company, was established in 1994, with a very focused mission:

To develop and market, through new technology, a superior line of cleaning solutions dedicated to providing significant, relevant added value in terms of performance, safety, health and environmental benefits. To deliver proven safety, health and environment benefits with no sacrifice to product performance and remaining competitive in price.

PROVEN SAFER FOR PEOPLE AND THE ENVIRONMENT

"CERTIFIED GREEN"

- We have multiple products Certified by Canada's "Eco Logo/ Environmental Choice Program", the US "Green Seal Program", as well as endorsed by independent bodies such as The Center for a New American Dream, Inform, and others.
- No other manufacturer has more products Certified by these leading bodies.
- In addition, we have many products approved by British Columbia Building Corporation, various states, provinces and cities.

PROVEN SOLUTIONS

All we do, and have done for close to 20 years, is engineer and manufacture proven safer cleaning products. We are not like other companies that have only recently introduced "Green" products.

Our products typically work as well as, or better than, traditional products and are priced competitively to any major brand.

Here is a brief sampling of comments from our loyal following:

For End Users:

"...quality, effective and efficient products that are good for our students & teachers, our caretaking staff and our environment. In addition, the price, service and value are second to none."

Robert Squires
Manager, Custodial Services
Trillium Lakelands District School Board (70+ Schools)
Customer Since 1994

For Distributors:

"Given the growing interest and demand in 'Green' chemicals, we extensively reviewed the products available making claims that they are safer for people and the environment. We wanted products that would provide our customers with demonstrated value. We found a lot of products that could not be proven to be Green and/or a lot of products that did not perform. After a thorough search, we concluded that Enviro-Solutions, with their broad product offering, their Eco-Logo Certification, their claims being independently third party verified, and most importantly, their products performing as well as or better than any major chemical products, will provide our customers with acclaimed value."

Ross Buzek
President, Domeclean
Customer Since 2002

"...our partnership with Enviro-Solutions has helped us grow tremendously our chemical business. Their specialty and niche products – such as conductive floor finish and freezer clean – as well as their full offering of janitorial products, not only helped us with the initial sales; their performance and benefits to people and the environment helped us develop stronger relationships with our customers."

Paul Bertalan
G.M., Swish Maintenance Limited USA
Customer Since 1994

For Sales Representatives:

"...if I can sum it up in one word, what Enviro has brought to us is 'value'. Value to us by providing a competitive edge with innovative and high performing products, and through this, value to our customers by providing solutions to their ever growing concern for health, safety and environmental issues..."

Andre Foisy
Director of Business Development, Larose et Fils Ltee
Customer Since 2000

WHY CHOOSE ENVIRO-SOLUTIONS?

PROVEN COMPETITIVE IN PRICE AND PERFORMANCE

We have had some of these customers for close to 20 years, with many for over 10 years. If the products did not work very well, were not priced competitively, or were in fact not safer for people or the environment, would they have remained a customer?

Our products are **GOOD • CLEAN • PROVEN**
